The Argentina 1935-51 Definitives

Introduction

In these notes I serialize the work I have done to understand the Argentina 1935-51 definitives. The work shown here is incomplete and somewhat incoherent. It also has some gaps. I have opted to publish these notes now, instead of waiting an indefinite and most likely long period of time until I am able to write a cohesive and coherent book on this most complicated definitives issue.

Beginning collectors to this series encounter several stumbling blocks when deciding which stamps to acquire from this series. The first stumbling block, which applies mostly to the Scott catalogue, is that the stamps have been grouped using a scheme that is based on the major watermark types; ignoring the difference for the same watermark of the various papers. The second stumbling block, which applies mostly to the Argentinean specialized catalogues, is that the various issues have been grouped in a loosely chronological scheme that separates Argentinean papers from imported papers.

Referring repeatedly to the Argentina 1935-51 Definitives lengthens the text needlessly. From here onwards I use the descriptor Arg3551 to refer to this series. It is difficult to discuss Arg3551 without being forced to mention several aspects of a stamp: the colors, papers, gums and watermarks vary throughout the issue. For this quick guide, I state the basic aspects of each stamp, and progressively increase the complexity of the discussion until I arrive at a complete description.

These stamps were issued in denominations from ½ centavo to 20 pesos. There is a remarkable factor of 4,000 between the largest and the smallest denomination. Arg3551 was in use from October 1, 1935 to as late as 1961, by which time only one value was in postal use. Arg3551 was also issued as Departmental Officials and 'Servicio Oficial' officials. I discuss the officials in this guide. I discuss the extensive postal history of Arg3551 only for the purpose of how it can be used to identify the various printings.

There are several printings that are constrained to a single paper, or have a unique set of characteristics that make this printing most useful as a guide to a beginning collector. In this guide I use these constraining printings to describe a process by which a random sample of Arg3551 can be easily catalogued.

Design Review

In this section I give a brief tour of the designs, and show tables with the most significant features. These tables summarize information that I present in more detail in later sections.

Departmental Officials

There are eight overprints representing departments, or ministries of the Argentinean government. These are:

M.J.I.: Justice and Public Instruction	M.M.: Navy
	
	
M.O.P.: Public Works	M.R.C.: External Relations and Culture
	
	

The two earliest papers were used for these overprints, the 1E1, in use between October 1, 1935 and all of 1936, and the 1E2, used in 1937.

The 10cR, the Rivadavia Red value, is found in two types, as shown below.

For the 1 peso stamp without map boundaries, the overprint is found along the top or the bottom of the stamp, as shown below.

The Argentina 1935-51 Definitives

There are 128 departmental official major issues, shown as gray boxes in the table below. There are additional color varieties for the 10c Rivadavia Red, since types I and II were each printed in dark red, and then a lighter red. The 50 centavo and 1 peso with map boundaries (1pL) are very rare used or on cover and were issued in small quantities. I will use the contraction DEPOF to refer to these officials from here onwards. The 25c DEPOF is only found on the 1E2 paper, making it an ideal stamp to study and uniquely determine this paper.

Servicio Oficial

There overprints replaced the departmental officials in 1937/38. There are several types of placement of the overprint relative to the stamp design and two types of overprint. The earlier type is slightly wider (12 mm) than the later type, both shown below. I discuss these in a chronological review left for later sections of this quick guide.

My reference scheme

I use my own reference scheme to describe Arg3551. This reference scheme enables me to have a more complete listing of the issues. I consider it a temporary scheme until I am able to arrive at a fairly complete listing.

The scheme combines:

1. The denomination in a computer-friendly format: For example, instead of 1/2c I use 05c, and instead of 2 1/2 c, I use 2p5c.
2. Mention of the person on the stamp (optional) or name acronym: I need this naming convention for the 3 centavos stamp, which was issued with the San Martin (SM) and Mariano Moreno (M) designs. The 20c Martin Guemes was issued with (JMG) or without (MG) the middle name shown.
3. Reference to the paper if I know of more than one: There are 30c1E1, 30c1E2, etc. If the stamp was only issued on one paper, there is no need for this naming convention, as is the case for the 3cSMGr, which was only issued on the 1E1 paper.
4. An additional reference for a specific plate: This naming convention is required for the 10c Rivadavia red, with types I and II, and the 10c Rivadavia Brown, with types A and B.
5. An additional reference for a specific color: This naming convention is required for the 15c Small Format Cattle, issued in dark blue and only on the 1E1 paper, as 15cSC-D, and also issued in light blue and on a later paper, as 15cSC-L.

I mention several examples that show how my naming convention works:

1. The 8c value was issued in one design, on one paper, on one plate, and on one color. Reference: 8c.
2. The 10c Rivadavia was issued in red and a range of browns, on many papers, and on at least four plates. Example references: 10cR-I, 10cBRCL1-A.

For the 18 papers I use the following scheme:

1. The early papers with the first watermark are the 1Ex papers, with x as of this edition being 1 to 4.
2. The clay papers were printed in two groups, CL1A and CL1B in 1943; and CL2A and CL2B in the 1950s.
3. The un-watermarked papers are of two types: grid from 1945 (NGR), and opaque from approximately 1948 (NOP).
4. The paper with the second watermark is found in three types: clear (2C), diffuse (2D), and with narrow rays (2N).
5. The late papers with the first watermark are the 1Lx papers, with x as of this edition being 1 to 5.

25c and 50c bundles part 7, 50c1Ls

The 50c received ample use during the 1950s. I find five major types, of which three are well represented in this selection.

The 1951 paper, the 1L1, is bright white and has a medium RA. This stamp is only found with a distinctive deep orange background.

The Argentina 1935-51 Definitives

The 1L2 paper, with large to gigantic RA. This stamp is only found with a distinctive pale red frame and faint background.

The Argentina 1935-51 Definitives

The 1L3 paper, similar to the 1L1 paper (next page). This stamp is only found with a distinctive deep yellow background.

I find two watermarks, each with variations: horizontal, small RA on very porous white paper; and vertical, with large, neat RA. I find both diffuse as well as clear. I find two types of background, one almost continuous, and another with lighter and lighter bands surrounding the sub-continent.
